CASE SCENARIO

Customer

Hi, I would like to purchase small fans to be used as ventilation for my upcoming projects' panel boxes, do you have any suggestions?

Hi, we have just the product for you!
Let me introduce to you our **MU Series** AC axial flow fans.

It is compact and slim, starting from 80mm frame size and 25mm thickness, and able to generate high air flow as well.

Not only axial fans, Oriental motor also offers Centrifugal blowers and Cross flow fans that are excellent in ventilations as well

Centrifugal Blowers

Crossflow Fans

Customer

That's very good! I never knew Oriental Motor has wide range of fan products too. How about accessories?

Please do not worry. We will offer you the fan together with finger guard, screws and power cord.

I see, would you be able to provide technical support if I face any troubles after purchasing?

Yes, we have a dedicated technical team that can assist you with any difficulties; you can contact us directly via E-mail, Hotline or Live Chat.

Thank you! I shall look into the **MU Series**!
