7. Downloading of sample programs on the website

Seminar Synopsis

This seminar would cover the basic installation and set-up procedures for our MEXE02 data setting software. This software is used with most of our latest products for easy parameters and operation data settings. Customers who have yet to purchase or have already purchased products that can be used with our MEXE02 who want to know more about the programming capabilities are encouraged to come and explore the various functions available!

Click to register online, alternatively you may also register through our Hotline : +65-6745-7344 or Email us at : Sales@orientalmotor.com.sg
