Technical Information

Differences comparing conventional AC motors with KII Series

High Permissible Torque

The permissible torque is twice that of conventional models

Increase in the strength of the gear raises the maximum permissible torque to twice the torque when compared with conventional models. A torque range that was unavailable can now be used.

● Gearhead output (permissible) torque for 25 W

● Gearhead output (permissible) torque for 100 W

Silent

Reduced gear contact noise
 by 6 dB

Noises from motor/gearhead contact have been reduced by 6 dB compared with the conventional standard motor.

● Comparison of the noise level in the 80 mm frame size type
